

**Script for nursing staff**Ask **Suicide-Screening** Questions**Say to parent/guardian:**

“National safety guidelines recommend that we screen all kids for suicide risk. We ask these questions in private, so I am going to ask you to step out of the room for a few minutes. If we have any concerns about your child's safety, we will let you know.”

Once parent steps out, say to patient:

“Now I'm going to ask you a few more questions.”

Administer the ASQ and any other questions you want to ask in private (e.g. domestic violence).

If patient screens positive, say to patient:

“These are hard things to talk about. Thank you for telling me. I'm going to share your answers with [insert name of MD, PA, NP, or mental health clinician] and he/she will come speak with you.”

If patient screens positive, and parent/guardian is awaiting results, say:

“We have some concerns about your child's safety that we would like to further evaluate. It's really important that he/she spoke up about this. I'm going to talk to [insert name of MD, PA, NP, or mental health clinician], and he/she will further evaluate your child for safety.”
